Re: HB 333

From: Kelly David, R.S.
Food Safety Advisory Council Member

I am neutral to House Bill 333 as introduced.

I would make one suggestion to substitute the term "fresh milk or cream" as stated in 50-50-202(3c) with the term "potentially hazardous food" which is currently defined. For example, reconstituted powdered milk is potentially hazardous and the current proposal as stated does not prevent it from use. Using the term "potentially hazardous food" broadens the exemption to ensure that this bill's intention of serving coffee or tea remain simple and straightforward.
